PROFILE

Software Engineer specializing in backend development and scalable system architecture, currently building production systems remotely for ILLAFTTrain (UAE). Experienced across Laravel, Filament, and React, with a portfolio of 5+ production systems spanning healthcare, e-learning, travel, and marketplace domains. Skilled in RESTful API design, database optimization, real-time features, AI-assisted development, and unit testing. Committed to clean, maintainable code and clear team collaboration.

PROFESSIONAL EXPERIENCE

Software Engineer · ILLAFTTrain JAN 2026 – PRESENT
United Arab Emirates · Remote · Full-time

- Build and maintain production backend systems in Laravel, with Filament admin panels.
- Apply AI-assisted development workflows to accelerate delivery while safeguarding code quality.
- Write unit tests to ensure reliability and prevent regressions across releases.
- Design and optimize database schemas and queries for performance at scale.

Full-Stack Developer · Onedoor MAY 2025 – OCT 2025
Türkiye · Remote · Full-time

- Delivered full-stack web features end to end using Django and Python in a fully remote team.
- Designed and built RESTful APIs and integrated third-party services.
- Collaborated across time zones to ship features and resolve technical issues on schedule.

Backend Developer · Helium Cloud JAN 2025
Freelance · Remote

- Delivered custom backend solutions with Laravel for a range of client projects.
- Built scalable, well-structured applications following best coding practices.
- Performed database analysis and optimized queries for high performance.
- Gathered requirements directly from clients and provided technical recommendations.

TECHNICAL SKILLS

LANGUAGES

PHP Java Python C++

BACKEND FRAMEWORKS

Laravel Filament Spring Boot
Django

FRONTEND

React Blade Vue.js HTML CSS

DATABASES

MySQL PostgreSQL
Design & Optimization

APIS & INTEGRATION

RESTful APIs JWT Sanctum
Stripe / PayPal Postman

REAL-TIME

WebSocket Laravel Echo Pusher
Firebase

PRACTICES & TOOLS

AI-Assisted Dev Unit Testing SOLID
Clean Code Git

EDUCATION

B.Eng. Information Technology Engineering

Software Engineering track
Damascus University — Faculty of ITE
4th year · Expected graduation 2026

LANGUAGES

Arabic Native
English Professional

INTERESTS

Chess
Literature

On-site

- Developed and maintained web applications using Laravel, Blade, and Vue.js.
- Applied SOLID principles and clean architecture for maintainable, scalable systems.
- Designed and optimized database structures, improving performance and reliability.
- Collaborated with the team to integrate APIs and enhance features.

SELECTED PROJECTS

Umrain — Multi-Vendor Travel Marketplace. Unified booking platform for 6+ service types via a polymorphic engine, with commission and multi-currency support.

Laravel 10 · MySQL · Stripe / PayPal · Pusher · Spatie Permission

Pear — Coaching & Clubs Platform. Real-time video sessions connecting coaches and clubs with members, featuring per-session Agora tokens, slot-based scheduling, and payment processing.

Laravel 10 · Sanctum · Agora SDK · Stripe · Firebase · Broadcasting

University LMS — E-Learning System. Scalable learning platform with resumable video uploads, progress tracking, and course workflows.

Django REST · PostgreSQL · Celery · Redis · AWS S3

Jaramana Clinic — Medical Management. Clinic system with dual authentication, immutable medical records, and real-time chat.

Spring Boot 3 · Spring Security · JPA · PostgreSQL · WebSocket (STOMP)
